Team ASA Announces NPWR up-grade, powerful Linux engine now available with Dual Gigabit Ethernet ports.

San Diego, CA -- Team ASA Inc., a manufacturer of high-performance networking products for Networking, Pre-Press and Digital Multimedia professionals, today announced a major upgrade to the **NPWR** Linux engine.

NPWR, the first Single Board Computer (SBC) designed for manufacturers and OEMs in the Network Attached Storage (NAS), RAID, and Personal Server marketplaces, is now available with dual Gigabit Ethernet ports.

The **NPWR** is powered by the Intel XScale™ processor, the RISC CPU with clock rates reaching as high as 733 Mhz. **NPWR's** standard configuration includes a 160 Mbytes per second (LVD) SCSI port, 8 Mbytes of FLASH ROM, 128 Mbytes of SDRAM and a Gigabit Ethernet port. Optional models of **NPWR** can be configured with Dual Gigabit Ethernet ports.

"Dual Gigabit Ethernet ports enable **NPWR** to fill user needs, such as Firewalls, Routers and Gigabit Ethernet Repeaters" said Mark Murray president of Team ASA. "NPWR is the best and most highly integrated solution for OEMs" stated Murray.

Every **NPWR** includes Team ASA's Linux port on CDROM. The **NPWR** CDROM also includes all tools, documentation and sources needed to make any **NPWR** based product an immediate success. **NPWR** is factory configured with a Flash ROM disk running Linux to ensure expedited product development.

"OEMs can use **NPWR** to build NAS, Mail Servers, Firewalls, Routers and Web Servers" said Mark Murray, president of Team ASA. "Our customers can take the **NPWR** out of the box and implement a new product in a single day."

Team ASA will begin shipping Dual Gigabit Ethernet versions of the **NPWR** on November 1st, 2001. Suggested retail pricing for Dual Gigabit Ethernet at the following speeds is as follows, 400 MHz **NPWR** is \$1,295; the 600 MHz **NPWR** is \$1,395 and the pricing for the 733 MHz. **NPWR** is \$1,495.

About Team ASA, Inc.

Team ASA, Inc. designs, develops, and markets high-speed networking communications solutions for Pre-Press and Digital Multimedia professionals. Team ASA's products increase the productivity of professional users working with large files in networked environments. Team ASA solves the common problem of long delays when sending large multi-megabyte digital files across a network. Team ASA's released the NPWR in June of 2001. Team ASA 's current product line also includes the Stallion GT/GE Gigabit Ethernet adapters and MacServer IP, a high speed AppleShare IP server for Windows NT and Windows 2000.
