**Team ASA announces the newest member of the NPWR Single Board
Networking Computer Family, the dual CPU, NPWR-DP**

San Diego, CA -- Team ASA Inc., a manufacturer of high-performance networking and storage products, today announced the newest member in the NPWR family of Single Board Networking Computers the “**NPWR-DP**”.

The NPWR-DP is Team ASA’s first multi-processor Single Board Networking Computer (SBNC). The NPWR-DP processing core consist of two Intel Xscale 80200 CPUs running at 733 MHz. The NPWR-DP architecture allows 100% independence for both CPUs. The NPWR-DP I/O suite includes Dual Gigabit Ethernet ports via two Cat-5 connectors, 8 (1.5 Mbs) Serial ATA (SATA) ports, and 32/66 Mini PCI socket. The NPWR-DP memory array supports dual SO-DIMM sockets and can handle a total of 2 Gigabytes of DDR memory. The NPWR-DP has a 16MB FLASH ROM Disk for support of dissimilar operating systems if required.

“The NPWR-DP is perfect for OEMs who wish to embed a high performance RAID Controller.” quoted Mark Murray Team ASA’s president. “The NPWR-DP gives the user onboard hardware RAID with no degradation in performance across any application”, continued Murray.

As with all NPWR SBNC products, customers can take the NPWR-DP out of the box and implement a new product in a single day. The NPWR-DP shares the same 5” by 8” common footprint as all other NPWR family boards. The NPWR-DP with it’s available mounting brackets can be installed into any half-height 5.25” drive bay.

As with every NPWR SBNC the NPWR-DP can be shipped with either Linux or NetBSD preloaded. The NPWR CDROM also includes all tools, documentation and sources needed to make any NPWR-based product an immediate success.

The price of a NPWR-DP configured with Dual 733 Mhz Intel Xscale CPUs, 512 MB of DDR SDRAM, Dual Gigabit Ethernet ports, and 8 SATA Ports in 100-piece quantity is \$1,495.00 USD.

Team ASA, Inc. will display it's product line including all NPWR SBNCs and NPWR Server family members during the Storage and Networking World Show in Phoenix, AZ on April 5th, 6th, 7th, and 8th, 2004.

About Team ASA, Inc.

Founded in 1992, Team ASA, Inc. (Team ASA), designs, develops, and markets networking and storage solutions for mid to large scale OEMs. Team ASA products allow OEMs in the Networking and Storage industry to easily implement embedded Linux and NetBSD systems either in existing products or in completely new products.
