Team ASA announces the NPWR-XTR series boards based on the Intel 81348 Dual Core Xscale CPU!

San Diego, CA -- Team ASA Inc., a manufacturer of high-performance networking and storage computers, today announced the newest board series in the NPWR Single Board Networking Computer family of products, the "NPWR-XTR" series boards.

The NPWR-XTR is a series of three new boards, the series consist of the **NPWR-XTRM**, **NPWR-XTR2** and the **NPWR-XTR1**. The NPWR-XTRM features an Intel 81342 Dual Core Xscale CPU, four SATA ports and Dual Gigabit Ethernet ports. The NPWR-XTR2 features a Intel 81348 Xscale CPU, 8 SATA/SAS ports, 4 SATA ports, and Dual Gigabit Ethernet ports. The NPWR-XTR1 features an Intel 81341 Xscale CPU, four SATA ports and Dual Gigabit Ethernet ports. The NPWR-XTR series supports up to 2 Gigabytes of 533 MHz DDR2 memory via a SODIMM socket.

"The NPWR-XTR series boards can be clocked at 667 MHz, 800 MHz or 1.2 GHz, making the NPWR-XTR series of boards the highest performing NPWR boards ever." quoted Mark Murray CTO of Team ASA, Inc. "The Dual Core CPU on the NPWR-XTRM will enable some applications to achieve a 400% increase over previous NPWR offerings" stated Murray.

The NPWR-XTR utilizes Team ASA's second generation 4" by 6.5" form factor, this compact foot print allows the NPWR-LCX to fit easily into all 3.5" drive bays and most 3.5" disk enclosures. The 3.5" footprint means that the NPWR-XTR series boards are highly compact and easy to embed.

As with every NPWR SBNC the NPWR-XTR series boards are shipped with Linux OS preloaded. The NPWR Developer Kit CDROM also includes all tools, documentation and sources needed to make any NPWR-based product an immediate success.

Sample quantities of the NPWR-XTR board series are available in May 2007, production quantities will be available in July 2007. The price of a NPWR-XTR configured with Dual Core 1.2 GHz Intel Xscale CPU, 4 SATA ports, 512 MB of DDR SDRAM, Dual Gigabit Ethernet ports in 100 piece quantity is \$795.00 USD.

About Team ASA, Inc.

Founded in 1992, Team ASA, Inc. (Team ASA), designs, develops, and markets networking and storage solutions for mid to large scale OEMs. Team ASA products allow OEMs in the Networking and Storage industry to easily implement embedded Linux systems either in existing products or in completely new products.
