Team ASA Announces Npwr Server, the first personal Internet Network Attached Storage / Server for Macintosh

San Diego, CA -- Team ASA Inc., a manufacturer of high-performance networking products for Pre-Press and Digital Multimedia professionals, announced **Npwr Server** today.

Npwr Server is a small self-enclosed Network Attached Storage (NAS) server that provides unparalleled performance to Mac, iMac, and PowerBook users. About the size of small external drive box, **Npwr Server** provides native AppleShare connection over both TCP/IP and Appletalk via a built in Gigabit Ethernet interface. Software support for client and server connections to Windows and UNIX platforms are also available. **Npwr Server** can be used as a personal NAS device, a personal Linux based server, or an internet attached storage server. Multiple **Npwr Server** units can be configured as scalable clustered servers.

"This is a new product offering that we are very excited about" said Mark Murray, president of Team ASA. "**Npwr Server** was designed from the ground up for the Macintosh."

About the Team ASA Npwr Server

The **Npwr Server** is an advanced high performance Linux based server with a very small footprint. The **Npwr Server** hosts an Intel XScale RISC CPU running at speeds up to 733 MHz. The XScale CPU is complemented by a high-speed 160 Megabyte per/second SCSI disk interface and a high performance Gigabit Ethernet over copper, 1000 BaseT interface. The **Npwr Server** also includes 128 Megabytes of SDRAM and 4 Megabytes of FLASH ROM. The **Npwr Server** supports client connection between Mac OS 8-X, Windows 98, NT-2K, UNIX and Linux based systems. **Npwr Server** provides AppleShare IP file transfers at rates exceeding 20 Megabyte per second.

Team ASA will begin shipping the **Npwr Server** on June 1st, 2001. Suggested retail pricing for the 30 Gigabyte, 600 MHz version is \$1,495; the 60 Gigabyte, 733 MHz unit is \$1,995.

About Team ASA, Inc.

Team ASA, Inc. designs, develops, and markets high-speed networking communications solutions for Pre-Press and Digital Multimedia professionals. Team ASA's products increase the productivity of professional users working with large files in networked environments. Team ASA solves the common problem of long delays when sending large multi-megabyte digital files across a network. Team ASA's current product line includes the Stallion GT/GE Gigabit Ethernet adapters and MacServer IP, a high speed AppleShare IP server for Windows NT and Windows 2000.
